### 3. Executive summary

This report describes the newsletters related to the SecurePART project, starting 1st of May 2014 and ending on 30th of April 2016.

The main objective of this document is to detail the newsletters that were created and dispatched during the project duration.

The project partners have been very active in the dissemination of the project outcomes and activities, supported by a set of dissemination materials where the newsletters are included.

4 Electronic newsletters were developed containing the results, activities and achievements of the project.

Each of the 4 newsletters were uploaded in the public section of the website and dispatched to our mailing list of contacts.

Initially expected to be delivered every 6 months, the consortium decided to dispatch them with a different timeline in order to include the most relevant information timely and be more useful to the target audiences:

- #1 December 2014
- #2 October 2015
- #3 February 2016
- #4 April 2016

In general the SecurePART newsletters included:

- Presentation of the Project
- Presentation of the partners
- Contacts and social networks information
- Links to project presentation(s)
- Information on activities performed in the project and that are scheduled in the near future
- Results and achievements within the project
- Links to the public deliverables available until publication of the newsletter

Besides this general information, each newsletter contained specific information as described below.

## 4. Newsletter #1
